## **Remove Control - Solo**

**Personnel:** Remove Control Solo = Tomi Simatupang - Vocals, Electric Guitar, Loops,

**Guitar:** Epiphone Casino (hollowbody, single coil pickups)

**Pedalboard:** 1x

**Looper** JamMan Stereo

**Amp:** Dynacord Hall Jazz (10W class A)

**Important:** Tomi will decide during soundcheck, if Amp will be used, because he has to hear the room first.

**On stage Mixer:** Phonic Helix 12

**Important:** Tomi will use an on-stage mixer. If no guitar Amp will be used, everything will come from this mixer. The output signal will be Main L & R, Line symmetrical.

**Important stage requirements:**

The stage / floor, where Tomi and his instruments, Pedalboard and Looper will be located **must be stable and plain!**

Electricity outlets required: 3 minimum.

**Personnel to be provided by venue / E.O. :**

**Sound technician(s), who know(s) the equipment which will be used and will be working at soundcheck, during the show and dismantling after.**

**Equipment to be provided by venue / E.O. :**

- 1x FoH stereo mixing board with at least 2 channel strips with symmetrical TRS line inputs and 1 channel strip with xlr mic-input, Monitor path
- 1x Poweramp + Speakers OR active mit Loudspeaker System.
- 1x Monitorbox
- 1x Vocal Mic(e.g. Shure SM 58)
- 1x Guitar Amp Mic (please hold ready although tomi might decide not to use it!)
- 3 Mic Stands. Vocal Mic Stand must be boom!  
third stand is for footage (HN4/camera)
- 1 x Mic cable xlr, 5 m minimum
- 2 x Line cables SYMMETRICAL 1/4 TRS male -1/4 TRS male which must reach from onstage mixer to FoH mixer!

**Notes:** If FoH Mixer only has unsymmetrical inputs, cable must still have three poles, but ring must be disconnected to prevent damage to mixer. If guitar amp will be used, it should be rised. The riser can be anything as long as it's stable and doesn't look too bad.

**Timing**

Assembly: 15-20 minutes

Soundcheck: 30 minutes minimum

Time between soundcheck finish and Tomi's Set: 30 minutes minimum !
